

Vermeer Caribbean Inc. the authorized dealer for Vermeer Equipment with over 25 years of market support in equipment sales, parts and service specializing in various market segments including: Underground Construction, Environmental, Renewable Energy and Mining. Our product line offers a variety of machines from pedestrian style Trenchers through large Track Trenchers, Trenchless Equipment starting with our Pneumatic Piercing tools to our complete line of HDD Horizontal Directional Drilling Machines as well as hand fed Brush Chippers through large Tub & Horizontal Grinders, Pile Driving Equipment for the Photovoltaic markets and Surface Mining Equipment to complete our line. We welcome you to visit us at www.vermeersoutheast.com or www.vermeer.com for more information on our complete line of products and invite you to view our promotional video www.youtube.com/watch?v=G1a1V9S3e_4 "Equipped To Do More".

For further information you can contact Manny Ayala, VP of International Business at mannyayala@vermeersoutheast.com or 1-561-379-5854.

On Grand Cayman, the Water Authority currently owns four RO plants, two of which are located in George Town and have capacities of 5,000 and 6,000 cubic meters per day. Another, in Lower Valley, operates at 3,000 cubic meters per day, and the North Side plant produces 9,000 cubic meters per day. The water produced by these RO plants is stored in 8 reservoirs, which have a total storage capacity of 51,100 m3 or 13.5 million US gallons. The Water Authority's Grand Cayman Water Distribution system presently comprises 300 miles of pipe work, varying in size between 3 inches and 16 inches.

"In Cayman Brac, it's a little different," van Zanten says. "It's a smaller island with about 2,000 people. We started there with a small RO plant and a very small distribution system in 1991. The rest of the island was covered by five water trucks that we own and operate. Historically, it was about 50 percent pipeline,

50 percent trucks. And that lasted for quite some time. Two years ago, we started expanding our distribution system in Cayman Brac and, hopefully, in about ten or twelve years' time, we'll have that entire island covered with piped water, as well.

"There's also a small island, Little Cayman, which has only a few hundred permanent residents who rely on tourism, and we will have a small plant on that island as well and we will truck the water to various customers, because, based on the number of customers we would have there, and the size of the island, it isn't economically feasible to provide piped water to that island."

Regarding wastewater, in 1988, the Water Authority completed the construction of the West Bay Beach Sewerage System, which provided for the collection of wastewater from the main tourist area along Seven

Argo American is the premier innovation firm focused on servicing and empowering the Nations of the Caribbean with critical infrastructure equipment, services and technology.

ARGO AMERICAN IS A PROUD DISTRIBUTOR OF A BROAD ARRAY OF CRITICAL INFRASTRUCTURE EQUIPMENT

We specialize in used bucket trucks, used digger derrick trucks, used crane trucks, used telecom equipment and parts for all these vehicles. We are the key Caribbean supplier of Certified Used Altec Equipment, and offer a multitude of other certified equipment brands, including: Aerial Lift of CT, Holan, LiftAll, MTI, Pitman, ReachAll and Teco. We are also a supplier of parts necessary to maintain the equipment... and much more. Please just let us know what you need.

- Certified Mobile Service Dispatched to Locations Across the Caribbean
- Used or New Bucket Truck Parts
- Delivery Assistance - International Shipping

ARGO AMERICAN IS CONSTANTLY STRIVING TO RAISE THE BAR. OUR POWERFUL AND COMPACT ARGO MODEL DOES JUST THAT!
