

waterproofing solutions for non-roofing applications, and even the United States, Rivera says that increassuch as those required in infrastructure projects and ing its export market is on the top of her agenda over the coming years. "We want to be well-known, wellbelow-grade applications. We are continually conducting studies and researching how to improve each prodaccepted, well-used, and well-recognized out of our uct component, while designing new alternatives for a geographic region; out of what we always call 'the hun-

more resistant and longer lasting membrane. And we are always very environmentally conscious and have created our roofing systems to be eco-friendly and energy-saving."

While Danosa does export its products to places such as Chile, the Dominican Republic, other Caribbean islands,
